

## Woodcote Hit a Wheelie Down the Road

Children from Year 5 took part in Bikeability at Woodcote Primary School

By Dylan J

On the 15<sup>th</sup> and 16<sup>th</sup> of October 2025 the year 5 children from Woodcote primary school Brang their bikes to school to learn how to ride a bike.

We asked Tian [10 years old] did you like the instructors? “The reason I liked the instructors was because they taught us how to be safe on the roads”.

And then they did their ABCD checks A-Air B-Brakes C-Chain D-Direction, drop.

And then they got on their bikes and started doing some minigames. And

some laps around the netball court they played a game where they had to ride through a gap that got smaller and smaller after a while the children went on the roads of Woodcote.

We asked Josephine [10 years old] did you like going on the roads “yeah, it was much more fun because I feel that I am a more confident cyclist then just cycling on the playground”.

And then they had to stop for a bit because the instructor was talking to them about being safe on the roads and some other things about parking your bike like junctions u turns and signalling.

We asked Laila [10 years old] did you like getting the badges “I liked getting the badges, but I literally only got one and I didn't really like the helmets”.
